

Is there something we missed pertaining to Admirals Lake or The Shelter? Please feel free to leave a brief comment below.

Good survey. Would love to have freshwater fishing opportunities as described if sustainable

Lake residence should pay most of the cost since they benefit and enjoy the 'lake'.

Please keep all homeowners on the lake directly informed is ACBC actions involving the lake.

Please don't let lake issues become as divisive as the pool.

Update/repair the shelter to provide running water, bathrooms. Handicapped accessible.

I would like to see a "buffer" of 3-4 feet of uncut vegetation along the volleyball lake edge area for fowl habitat and a block or suppression of goose poop washing into the lake. I would also like to see natural ways tried to reduce algae before any other money is spent on chemicals or machines which could take a couple of years to study. I would like to see if Island County would purchase the lake, road and bluff. This community cannot support or afford fixing a natural catastrophe that may likely occur.

I struggle with Keystone residents carrying a larger financial load for lake costs and charging "folks up the hill" for a lake they will never use. The pool is for swimming.

The wildlife flourishes on the lake, I really enjoy viewing all the wildlife on the lake. Canoes seem harmless.

I would like the lake to be used more

Appreciate efforts of Lake Committee to develop a protocol that will serve needs and desires of community.

I am a non-resident lot owner

Engage the existing supporting infrastructure, provided by the county, state or federal entities. Perform due diligence pertaining to alternate (external agencies) support BEFORE billing residents for ideas that support a small minority of residents.

Thanks to the lake and shelter committees for your hard work.

strongly agree that motorized craft not be allowed

Thank you for naturally taking care of the lake for wildlife and people. Give a hoot, and don't pollute! Our actions are taking away the lake's oxygen. It is up to us to give the lake a chance to once again thrive.

We like the peace and quiet of the lake and sounds of nature. We would be opposed to motorboats being allowed on the lake.

Anything done with the lake should be coordinate Conservation distract. All the septic systems along the lake should be test for discharge into the lake.

Lower the fees, you utter crooks.

Lake is a great place for birds and small critters. For me that is the best thing the lake offers residents here. Fishing would be nice for kids.

I believe small electric motors for boats, canoes, etc. with a maximum of 90 lbs thrust should be allowed. Some provision should also be made for RC model boats.
